

Chairman Martin.

I am writing to suggest you and your commission deeply consider the impact your decisions will have on this segment of our American population.

I am a consumer and I greatly enjoy my opportunity to listen to Christian programming in my community. I could not imagine not being able to select this programming whenever I desired.

I do not think that this portion of media should be treated any differently than any other. Do not impose criteria upon them, that you would not on others.

You have a great responsibility, since you were not elected to this position on the committee, you have a certain level of latitude that is unregulated. Be wise with your decisions, know that a great number of Americans are concerned and want you to rule in our favor. Restrictions must be the same for all and not just for some, and Freedom must also follow the same.

I will watching to see that you are understanding and fair in your decisions. If you are not, I will join with the others to make sure you are held accountable.

Christian Broadcasting serves those who seek it, it does not impose. I listen to many other types of programming also, it is my perogative as an Ameican to make those choices. I wish to continue living in this manner.

If Christian Broadcasting is doing something outside the Law, please make us aware. We would see it rectified.
