

I am opposed to community advisory board rule change. The radio market is already highly competitive and allows a wide range of diverse viewpoints. The rule change under my opinion would allow malevolent groups bully radio stations that provide a viewpoint that they don't agree with. It would allow suppression of speech by extreme leftist groups that subscribe to an Orwellian political correctness. I am afraid it would also be used to stifle religious speech and freedoms. I urge the FCC not to make this rule change.
