

I would like to make some things known regarding Christian radio.

In particular, I and my family are very fond of Air 1. This station sends a particularly relevant and uplifting message to the public at large. It is extremely counterproductive to try to end this very valuable and good radio station.

There are three proposed changes that are specifically onerous:

**Community Advisory Boards:** This would allow individuals who do not agree with Christian radio to silence those of us who do. It is an attempt to censor the people's thoughts and beliefs.

**Require Additional Staffing:** This would require additional staff that is unnecessary and costly to smaller stations. There is no point but to expand governmental oversight in an area in which it is unnecessary and unwelcome.

**Force Many Translator Stations Off The Air:** Allowing priority to Low Power FM stations (LPFM) rather than existing translator stations. What is the purpose of this proposal? Why do LPFMs get priority over existing higher power Translators? Again this is just more governmental intervention that is unnecessary and onerous.

Please consider the long-term ill effects of this legislation. It is unnecessary and counterproductive to the good of our great country's people.
