

Concerning proposal 04-233

Obviously there is someone with too much time on their hands. This proposal is ridiculous. We don't need government mandates to regulate what to say or what to listen to on the radio. There are a lot of stations on the radio that I don't listen to. That is why radios are equipped with a channel selector. Free speech and the free market have done its own regulating quite well. When the community thinks that a radio station is not serving its interests, the station stops making money and goes out of business. Thats how we can tell if the interest of the community is being met. The advocates of 04-233 need to get a life and quit ruining everyone else's. I oppose 04-233 strongly.
