

I say no to regulation proposal mb04-233 It increases operating cost to high, and brings about censorship to current radio-media programming.

This will create a cluster of hoge poge programing, aim to destabilize, and feed the notion state run propaganda like before in prewar times.

Lacking the first amendment Right freedom of speech and entering into a era of censorship that will dope-down into a bureaucractic programing into which there is no freedom.
