

To Whom it may concern: Let this message be clear. People by virtue of their 'vote' (donation, calling in, etc) should and will ultimately determine what is wanted on any type of media be it radio/TV/Movie/etc. Why does the FCC care (with the exception of various extremes: porn, excessive violence and others) what is broadcast. Look back at the heinous days of the 70's with very few stations. Do we really want to return to that? Only limited censored propaganda as opposed to free expression. If you don't want to listen to something turn it off/switch the channel. The FCC should not get involved in what the community is asking for. The community can simply not listen/watch and in turn the advertising money will dry up and that media will pass through a democratic process. Not a legal/bureaucratic (sp?) process. Why should I support something I disagree with? If you force equal representation or apply a community request you will force people to support media they disagree with. Lastly, Free Speech is our most basic and fundamental right being blind to the information it protects. Suppress this or eliminate this and we are no better than a despotic regime. DO NOT SET THIS NEGATIVE ACTION IN MOTION. Keep the free flow of ideas moving through all available media. Let not our extremely diverse conversations be muted by the few elite who think they know what is best for the masses.

Very Respectfully,
Mr. Angelopoulos
