

My family and I wanted to let the F.C.C know that K-Love is important to us. It is one of the only radio stations that encourages its listeners with it's family friendly hosts and music that lifts up rather than tears down the listeners. As Christian citizens we feel the proposed changes you are considering will violate our rights of not only free speech but also our right to freedom of religion. There is a whole lot of crap out there on the radio and television that needs your attention but instead here you all are trying to pass legislation that would keep helpful caring folks off the radio; or at the very least create a situation that would make it difficult to keep Christian radio on the air. How can you all in good conscience keep someone like Howard Stern on the air for 20 plus years but make it difficult for some one like K-Love to stay on. I think you guys need a refresher course in American Government. We have this thing called the Bill of rights and the Constitution and I think its time that you all take a good look at it again before passing this.
