

Air1 Christian Radio is a major part of my life & the lives of many others in my community. It's positive music & programming is something rare in our world today & if new regulation were enforced on it that made it just another radio station with the same music & opinions as every other station, it would be a great loss & detriment to my community. The constitution guarantees our right to freedom of religion & forcing a Christian radio station to express anything that is contrary to it's basic beliefs is not acceptable.

If advisory committees are set up & required for every radio station, there is nothing stopping those who do not support Christians from annihilating the radio that we love if they are on that committee. Also, Air1 is completely non-profit & supported by listeners so if these new regulations require too much financially, they will no longer be able to support themselves.

Air1 may not be everyone's cup of tea, it may even be offensive to some because of their clear message. If that's the case, the radio can be tuned to any other station of that person choosing. If it is taken away completely, then people like myself have nothing left to listen to besides those stations offensive to me. Please don't cause this positive & encouraging public service to be taken away!
