Re: **EX PARTE**
AU Docket No. 07-157
ET Docket No. 04-186

Dear Ms. Dortch:

On April 30, 2008, Gerald Knoblach, Chief Executive Officer of Space Data Corporation (“Space Data”), Jim Wiesenberg, Chief Strategy Officer of Space Data, Jerry Quenneville, Vice President – Business Development of Space Data, and Greg Rohde, President of E-Copernicus on behalf of Space Data, met with Commissioner Jonathan Adelstein and Renée Roland Crittendon, the Commissioner’s Legal Advisor for Spectrum and International Issues, regarding the above-referenced proceedings.

The Space Data representatives discussed how wide-area technologies can address issues associated with build-out and landmass coverage for the 700 MHz D Block and how Space Data’s existing narrowband PCS network could provide a control channel for the TV White Space. In addition, the Space Data representatives noted that the FCC should consider in rulemaking proceedings all proven wireless technologies and ensure that any new rules and policies can accommodate existing and future technologies. The Space Data representatives also relied on the attached presentation.
