19 April 2008
Docket: 04-233

Respectfully to: The Chief of the Media Bureau, Congress Representative Mike Thompson, and President George W. Bush.

It has been brought to my attention that the FCC is proposing to change certain regulations. Regulations in regards to 'faith-based' radio stations;

- 1) That their broadcast will be regulated by community advisory boards.
- 2) A massive increase in running costs due to eliminating of labor saving enhancements.

To hear that something like this is even being considered greatly disturbs my family and I. It indicates that our country, one that prides itself on liberty and freedom for all, is nothing more than an illusion. Selling herself one little piece at a time to a dangerous ideal hiding behind a dark curtain. The curtain is hiding this ideal's true self and intent for the people, but there is to be no mistake made about its name, and that is 'communism' in whatever form you think it.

The constitution has been buried, only to be recalled by people who would abuse its meaning! Justice has been un-blindfolded and her scales tipped with gold! We have spit on the graves of every body which died and shed blood fighting for and defending the freedom and liberties of this country! Should they come back from the dead they would be a terrible force to reconcile with! I only say such things because I feel that the very threads that make this country great are being cut a little more everyday. I implore you not to partake in it.

Apart from morality and the fabric of our nation, may I bring another light on the subject? When a person pays the power company for electricity, they use a certain amount and pay for it. Now let's say that the energy commission changes regulations to designate energy usage, controlled by an advisory board. Now they are requiring that people can only use their television 8 hours a month, and turn their lights on for 4 hours a day. This would greatly infringe upon the peoples rights!

Faith based radio stations pay to broadcast, and the people/listeners most often pay/donate to enable the station to do so. Now there are new regulations which will be imposing upon a listener supported (by the people) station, by governing against their rights to free speech and religion (for the people). Such a proposal is both illegal and immoral, singling out a group of people in a discriminatory manner.

As for the additional costs to finances, your imposition is against cost effective and conservative practices. Such a required transition implies that its makers intentionally desire the organization to fail!

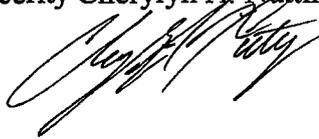

With a receding economy, donations for the organization already dangle by a delicate string. Asking the people to give even more will hurt the economy further. Should the station shut down it would eliminate jobs and destroy hope for those who listened to the station. Do not put out the flame the kindles the hope of the people!

As governing authorities the people have entrusted you with their best interests! Do not betray us, do not dismiss us, and do not walk on us! You are stewards of the people, under oath to serve and protect, guide and support, to ensure adequate provision, conduct yourselves honorably, and uphold the law.

I charge you now to fulfill your duty with honesty and integrity. Not just for the people, but also for yourselves that you may be satisfied that you did a good service. "For the only job worth doing is a job well done." Give the people reason to trust you, and keep your honor!

I ask you to disregard this proposed change in the FCC regulations to be brought forth on 28 April 2008. It is an attack on the American people, men, women, and children alike.

- With the greatest sincerity Cherylyn A. Nutting
