Deborah Taylor Tate
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Deborah Taylor Tate:

RE: FCC Proceeding 07-195

As you consider the service rules for the 2155-2175 MHz spectrum band, please make delivery of free and family-friendly wireless broadband (with service rule requirements to ensure it is available to at least 95% of the population) mandatory for any license holder.

We are living in an era where many Americans are struggling to make ends meet, where living costs are on the rise, and where by any objective measure, we are falling embarrassingly behind other countries in the deployment of broadband technology.

A free and universally available service would bring hope and opportunity to many Americans and would raise our economic competitiveness to the benefit of all Americans. Therefore, I encourage you to do everything in your power to move the machinery in Washington D.C. toward this important goal.

Please act today.

Sincerely,

William Dismuke

Net Neutrality 07-52

nkhall@gmail.com wrote on 4/7/2008 4:05:03 PM :

Dear Sir or Madam,

I am writing in regards to the issue of network neutrality. I am both a professional in the area of computer and network security for higher-ed environments, and an MBA candidate. As part of my studies I am currently taking a course on legal impacts for internet related businesses. In this course are studying issues such as intellectual property law, privacy, etc. One assignment from this course is to write an advocacy piece on a relevant topic. This piece is then to be share with some relevant parties. I chose to write on network neutrality as it is a current issue that effects me as a consumer, and one which I have knowledge and relevant insight due to my employment experience. In the attached piece I briefly lay out my arguments in favor of network neutrality, including experiences gained through my experince in higher-ed. As colleges and universities have been dealing with many of the issues involve in network neutrality, I believe they provide worthwhile insight into this debate. Should you choose to read it I hope you find it interesting and informative.

Thank you for your time,

Nathan Hall
