Dear Deborah Taylor Tate:

RE: Please support Free, family-friendly, nationwide broadband (FCC Proceeding 07-195)

I applaud the efforts of the FCC and Members of Congress who support the creation of a FREE, family-friendly, wireless broadband network that would be made accessible to at least 95% of Americans.

As many Americans struggle to make ends meet and as basic living expenses (food, gas, education) continue to rapidly rise, availability of a free and universally available service would bring hope, opportunity, and much needed relief to many Americans ? and it would raise our country's economic competitiveness to the benefit of all Americans.

Recent news reports indicate that the FCC Commissioners may cast a vote to support or reject free broadband for the 2155-2180 MHz spectrum band on or before June 12, 2008. Therefore I strongly encourage you to support this important goal as it would bring unprecedented benefits to this great country.

Please support free broadband in America today.

Sincerely,

Mary Revenburgh
