

I just dont understand this. 16 months and still not finished. Yes, Kevin Martin, you say you endorse this deal now, but not before dragging it down for 16 months. Have you bled these companies enough? Are you happy with the pain and suffering you have brought to the American people in an effort to make your friends at the NAB happy?

It took 16 months for you to decide on a price freeze for three years and space for minority programming? 16 months?

Sir! XM and Sirius only have 5 percent of the Market! The combination of these companies can not be compared to a monopoly in any shape or form. They are already loosing money. And the NAB has made sure this has continued to go on for 16 long months.

Indeed, the NAB must fund their lobby very well. How far reaching are the Arms of the NAB? By the way this Merger is being handled, it is evident they have very powerful control over People who are supposed to work for the American public.

Can you imagine the commission approving the Merger between Exxon/Mobil saying they couldnt merge unless a price freeze was placed on gasoline for three years?

We all know That could NEVER Happen, even though these companies are huge, and continue to Rape the People of the United States. Yet that merger was no problem at all. Two oil giants just simply merged. With almost NO resistance.

Yet you would think Sirius and XM where about to take over the world with all the attention this merger is getting. I have never seen so many so called "Important" people speak out against this tiny, insignificant Merger.

What a waste of tax payer money and Government resources!!!!
This Merger should have been approved Months ago.

If congress and such would pay as much attention to REAL ISSUES and focus the same amount of time as they have on this merger, World

hunger would be solved, The war in Iraq would have ended three years ago, There would be no unemployment, health care would be free, and every car in the US would be running on fuel cells.

This is a very sad state of affairs. Please, stop supporting the twisted agenda of the NAB and get this Merger approved now.

Fred
