

Hello Commissioners:

When the FCC Chairman is proven incompetent to meet a self imposed deadline three times, what respect do you think public should have for your agency in general, and you, the commissioners in particular.

Since no new information has been uncovered in this matter for the past three months, someone should be held accountable for this market manipulation. SEC is another joke of a federal bureaucracy.

You all must be ashamed of your proven incompetence!

It is a simple decision. You have all the info you are going to have. If you think merger is not in public's best interest, DENY it. If you think otherwise, approve it. Simple!

You are not going to get any additional earth shattering information. And, you are not getting any smarter, either.
