

The commercial BrightHouse Networks uses concerning the ability to "pause live broadcasts" ends with "the freedom to start and stop when you need it".

Too bad the ability to start and stop services from BrightHouse to homes in Live Oak Preserve in Tampa doesn't exist!!!

Can't afford cable, internet and security services right now? Need that money for, oh say, FOOD and Gasoline and Medicines? That's too bad!!!!

Because BrightHouse has a 10+ year, exclusive, bulk-billed contract in Live Oak Preserve, residents of Live Oak Preserve MUST pay for cable, internet and security services whether they can afford it or not. But don't forget, according to BrightHouse Networks, there are "no long-term contracts to sign".

So forget about starting and stopping services when you need it... that only applies to the general public not to MDUs where developer controlled HOAs can set up and approve schemes like "take-or-pay" with greedy providers like BrightHouse Networks. Oh, by the way, the neighbors down the street who chose food over the HOA dues and the neighbors whose house just went into foreclosure, their bills will be taken care of soon. All the other dues-paying neighbors will pay for those neighbors' arrears with higher assessments from the developer-controlled HOA that caused this mess in the first place.
