RE: Applications of Sprint Nextel Corporation and Clearwire Corporation For Consent to Transfer Control of Licenses and Authorizations File Nos. 0003462540 and 0003368272 et al., WT Docket No. 08-94

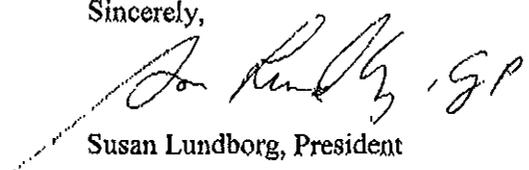

Dear Ms. Dortch:

Delta Band Services, Ltd, licensee of Broadband Radio Service Station license WHK958 (F-Group) in Lakeland, Florida files this letter in support of the proposed transaction between Sprint Nextel Corporation ("Sprint Nextel") and Clearwire Corporation ("Clearwire") to create New Clearwire Corporation ("New Clearwire"). Delta Band Services, Ltd. has been a licensee of 2.5 GHz BRS spectrum for a number of years and currently holds a grandfathered lease with a subsidiary of Clearwire.

Delta Band Services, Ltd supports rapid Commission approval of this transaction for a number of reasons. First, it will accelerate the deployment of the first nationwide mobile WiMAX broadband network creating a unique opportunity to deliver new broadband products and services in the 2.5 GHz band. Second, this transaction will enable our Station WHK958 to become part of the first 4G nationwide broadband network to be available to Americans. Third, we understand that the transaction enables New Clearwire to receive essential capital funding necessary to build and operate the system capable of deploying the next-generation nationwide mobile wireless broadband services and for which neither Sprint Nextel nor Clearwire can do alone. Combining Clearwire and Sprint Nextel's 2.5 GHz spectrum licenses maximizes spectrum build-out capability in Lakeland and elsewhere by minimizing challenging network deployment and operational effects arising from the 2.5 GHz's bands unique and varied historical service and licensing schemes.

Expeditious FCC approval is an essential condition precedent to New Clearwire's ability to get the \$3.2 billion capital funding necessary to deploy the 2.5 GHz nationwide mobile WiMAX network that will enable BRS and other 2.5 GHz licensees whose spectrum will be part of the network to obtain substantial public interest and educational benefits from a nationwide mobile WiMAX network at in the 2.5 GHz band. That is why Delta Band Services is filing this letter expressing its support for expeditious grant of this transaction.

Sincerely,

  
Susan Lundborg, President
