**Re: Broadband Industry Practices; Docket No. 07-52**

Dear Ms. Dortch:

On July 24, 2008, Robert Miron, Chairman and CEO, Advance/Newhouse Communications, had a telephone call with Commissioner Jonathan Adelstein to discuss the “network management” issues raised in the Petition for Declaratory Ruling of Free Press *et al.* and the Petition for Rulemaking of Vuze, Inc., which have been incorporated into the above captioned proceeding.

Mr. Miron reiterated the points raised in the comments and reply filed on behalf of the cable industry by National Cable & Telecommunications Association. He emphasized the importance of ISPs flexibility in responding to network management challenges and meeting customer needs.

Sincerely,

/s/ Dan Brenner  
Senior Vice President, Law & Regulatory Policy
