Re: MB Docket No. 07-57, Consolidated Applications for Authority to Transfer Control of XM Satellite Radio Holdings Inc. and Sirius Satellite Radio Inc.

Ex Parte Presentation

Dear Ms. Dortch.

This is to notify you of our phone conference meeting with Cristina Pauze, Legal Advisor for media issues for Commissioner McDowell. Mr. McDowell was not available to participate.

The meeting started at 10:30 am with discussions regarding previous filings as documented in our April 18th / June 18th ex parte filings. We also reiterated that we had been trying to confirm our meeting with Commissioner McDowell since April 3, 2008 through emails and phone calls via Brigid N. Calamis Deputy Chief of Staff. We expressed our gratitude for this phone conference.

During our meeting we discussed the upcoming Sirius/XM merger and our interest to participate in the lease arrangement and to provide compelling programming. We discussed our background of 20 years plus in telecommunications/media which uniquely qualifies us to bring value-add to this deal. We also discussed that we were not interested in just providing programming but as a minority female to bring diversity to this project for inclusion and to protect public interest. We shared that we have participated in the National Association of Black Telecommunications Professionals conferences and more recently been the catalyst for the Dr. Bill Cosby outreach and The Great Debaters city tour to reach our young people and their parents. We have created some compelling programming along with multi-media through documentary, feature film, and books based upon our life experiences which we feel will have a positive impact on our community through one on one personal accountability.

List ABCDE

We shared that we had met with Sirius Management Patrick Donnelly Executive Vice President and General Council and Scott Greenstein President, Entertainment and Sports; however my original request was to meet with Chairman Mel Karmazin.

Sirius senior management was interested in our content and have requested a programming proposal with as much detailed information as possible for their evaluation including scripts, program clocks, identity of hosts, demonstration tapes and other materials we may find valuable. They have also requested any other materials that show our operational and financial ability to deliver programming. We have requested a confidentiality agreement and/or NDA and holding close to our programming model. We have not received either to date.

We also shared our previous conference call discussions on April 18, 2008 with Chester Davenport of Georgetown Partners where he stated that they were far along in this process and were not considering any programming proposals at this point but that we could submit something. We requested a confidentiality and/or NDA and have not received to date.

Since the Justice Department recently approved the \$13 billion merger between Sirius Satellite and XM Radio and we are awaiting FCC approval, we propose a challenge to provide access and diversity to both the constituencies and independent owners for inclusion and long-term success through female minority participation through lease and "Programming with Purpose" to provide compelling and relevant content with both subscriber memberships and also advertiser-supported family programming. We are seeking a separate lease with XM/Sirius for an independent network of 1-2% with 2 channels on both Sirius and XM. This female minority equity interest will let us expand our reach to mothers in the United States and Canada to reclaim our children.

We appreciate this opportunity to help bring people out of deep holes and onto a victorious life.

Warm regards,

Belinda Bond
