

In the Matter of

Service Rules for Advanced Wireless Services

in the 2155-2175 MHz Band

Service Rules for Advanced Wireless Services in the 1915-1920 MHz, 1995-2000 MHz, 2020-2025 MHz and 2175-2180 MHz Bands

WT Docket No. 07-195

WT Docket No. 04-356

I would like to submit comments for the FCC FNPRM where they are seeking comments on proposed service rules for Advanced Wireless Service (AWS) [1] spectrum which they intend to auction.

Netsweeper has been providing Proven Advanced Premium Web Filtering Services to Large Networks and Broadband Service Providers around the world for over 9 years. With over 60 service providers either direct or via Strategic Partners, Netsweeper is well positioned to provide the Web Content Filtering that would satisfy the FCC's requirement for this important Advance Wireless Service across the USA.

Netsweeper would propose a solution that provided both the basic Global Web Filtering Requirements as well as a Network opt-in option of per user Filtering options.

Netsweeper is looking to partner with the FCC and or Service Providers in order to provide and share best practices on Nation Wide Web Filtering and provide this valuable Web Filtering requirement to this Country Wide Wireless Service Tender.
