Re: Ex Parte Communication, PS Docket 07-114

Dear Chairman Martin:

On August 20, 2008, the Association of Public-Safety Communications Officials, International (APCO), the National Emergency Numbering Association (NENA), and Verizon Wireless filed a letter proposing improved compliance measurements for the Commission's wireless E911 location accuracy rules governing handset-based providers. As a handset-based carrier, Sprint Nextel Corporation ("Sprint") submits this letter in further support of that proposal.

The proposed accuracy standard meets the concerns of public safety while acknowledging the limitations of current technology. Although setting the accuracy standard at the county level will impose significant testing costs and require substantial time to complete, the accuracy standards articulated should be achievable. Sprint commends all those involved in the work required to produce this proposal and urges the Commission to adopt this compromise.

Pursuant to Section 1.1206 of the Commission's rules, this letter is being electronically filed. Please let me know if you have any questions regarding this filing.

Respectfully submitted,

/s/ Anna M. Gomez
