

I can only comment on the problem facing residents of Grimes County, Texas. We are in the DMA for Houston, and therefore can not receive the television stations from Bryan-College Station via satellite. There is no election coverage, school coverage (including closures) and rarely is a town in our county mentioned in any broadcast from Houston. Our area is covered by Bryan-College Station News. Please correct this problem and allow us to choose to receive programming that is important in our lives.

Thank you.
