

K.I.S.S is the best philosophy. Keep It Simple, Stupid! Sorenson has abused their power and influence to increase the difficulties in telecommunications among Deaf and Hard of Hearing people and between this community and the hearing people in their greedy pursuit of the almighty buck. Examples: refusal to make VPs interoperable until the FCC order; they then complied by allowing interoperability via the IP address, not the proxy phone number. Now they hypocritically saying they support the 10-digit NANP, but want to keep the same proxy numbers which keeps their control of deaf people's communications. These are just one of numerous examples of their lack of social consciousness. Sorenson deserves NO credibility with FCC or any arm of the Federal Government until they clean up their unethical and psychopathic attitudes.
