

I implore you not to allow the telecommunications industry more say and the local municipalities less say about where cell towers can be placed. Because of what I feel is an unconstitutional law, (Telecommunications Act of 1996) our Village of Bayville has allowed the placement of 52 plus antennas to sit on our water tower (water supply), in the middle of a residential neighborhood, just 50 short feet from our Elementary School Children. They absolutely refuse to take into account the potential horrendous health risks to our children, all the while hiding behind Federal Preemption while violating two restrictive covenants of the gifted deeded property on which the water tower stands. It is unconscionable--probably the worst situation in the country--don't allow it to be repeated elsewhere. Sincerely, Jo-Tina DiGennaro for the Bayville Residents Against Cell Towers 8 Robert Road, Bayville, NY 11709 516-628-1358 jotinad@yahoo.com
