

The irony of the proposed cell tower on Soledad Road is it is unnecessary at the proposed location. The tower should be placed in Kate Sessions Park (Public property) down the hill where there is an issue for some subscribers. People in cars stop roughly where the tower would be and continue their calls because half a mile down the hill, along side Kate Sessions park there are connectivity issues for some. I have never had a problem.

The only opposition by T-mobile for this site is the increased fees. Yet this resolves the issues of health and lowered property values for the affected customers. Please stop this madness.
