Subject: Cel Phone Towers
Good day, Mr. Rowan-

I am contacting you regarding the Cellular Telephone Industries Association's push to advance the proliferation of cell phone towers in our communities without consulting those communities- and while trying to hide the malignant effects of being in proximity to cell phone towers. We are living in an age where large corporations are pushing around the citizens that it is supposedly trying to serve; however, this is insanity. Please be a part of a better system that respects and honors the basic health rights of American citizens and our environment in general. Please do not honor the petitions what would push the limitation of local zoning authorities.

Thank you very much for your time,
Katarah Udarro
