**Written Ex Parte Communication**

RE: Sprint Nextel Corporation and Clearwire Corporation Seek FCC Consent to Transfer Control of Licenses and Authorizations, **WT Docket No. 08-94**

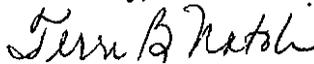

Dear Ms. Dortch:

I am submitting this letter to be included in the record of WT Docket No. 08-94. The purpose of this letter is to clarify the E911 capabilities for the future mobile VoIP service Clearwire will offer to its subscribers over the WiMAX network that it will deploy and operate upon Commission approval and consummation of the transaction described in the above-referenced proceeding. Clearwire takes emergency service obligations seriously, and shares Chairman Kevin Martin's belief that when someone dials 911, they have a reasonable expectation of being connected to an emergency services operator, whether dialing 911 from a traditional wireline, wireless, or VoIP phone, and that meaningful location information that permits first responders to reliably find that caller is available.<sup>1</sup>

When Clearwire's mobile WiMAX broadband platform under development is completed and Clearwire offers a two-way interconnected mobile VoIP service over this broadband platform to its subscribers, Clearwire's mobile VoIP service will meet the requirements of the Commission's E911 Phase II automatic location capability requirements.

Pursuant to Section 1.1206(b) of the Commission's Rules, this *ex parte* communication is being filed electronically. If you have any questions regarding this matter, please do not hesitate to contact the undersigned.

Sincerely,

Terri B. Natoli
