Dear The Federal Communications Commission:

I am writing to urge you to consider live musicians as you think about the impacts of opening wireless frequencies. The current proposal could cause harm to live musicians, companies that manufacture wireless music products, and everyone else who has a stake in supporting live musicians. Harmful interference could hinder the performance of live music in public schools, universities, churches, performing arts centers, outdoor arenas and countless bars and restaurants across the country.

This would hurt the everyone. Not just Microphone uses but anyone who goes to a theater, church or any other type of event. Almost all schools use wireless microphones. By making this change you would force schools that have little to no money spend tax payer money to buy new equipement that will never work right. Also churchs have such tight buget they will not be able to purchase new equipement. If this change is made I belive you will millions of people complaining.

Please think about the interests of live musicians and all who support them as you consider this proposal. Thank you.

Sincerely,

Carlo Baccarella
