

Concerning the Time Warner's request to spin off of its cable division I strongly object to the distribution of pornography thru its pay per view cable service or distribution in any other form as well. The FCC should stop distribution of "all" pornography due to its harmful content. Any American with common sense knows that this media degrades women, not to mention it degrades anyone who watches and gets addicted to it! It breaks up marriages and causes young boys and girls to start unhealthy lifestyles. I realize if you stopped them from allowing this media to be sold they would take a financial, but there are more honest ways to make money and making money shouldn't harm other people! Please consider this request and help the media get back to a honest agenda.

Sincerely,

Phil Cronin
