

I am appalled at your desire, interest, and attempts to limit free speech. Then again I am not surprised considering the underhanded attempt by those who do not appreciate the true freedoms we enjoy as Americans. This is a blatant attempt to limit my access to talk shows and topics of discussion that interest me. Are we to pray for pirate radio if this is implemented? As a Federal Agent, Marine, American, and Christian, I cannot sit by and see the FCC strip me of the very freedom I have fought for and continue to support. If a preacher wants to preach, it is his right from God. If a liberal wants to speak his agenda on the radio, it is his right though I disagree. I will actively announce the intentions of the left leaning politicians who are advocating this proposal to all at work, home, church and radio. I am INVOLVED, and will continue to help stop this erosion of my liberties. The commission must have ideals and a character that are not American because America is formed around basic inalienable rights, and the localism ideal is against one of the most important rights we have, free speech.
