Re: *Ex Parte* Communication, Revisions to Rules Authorizing the Operation of Low Power Auxiliary Stations in the 698-806 MHz Band, WT Docket No. 08-166; Public Interest Spectrum Coalition, Petition for Rulemaking Regarding Low Power Auxiliary Stations, Including Wireless Microphones, and the Digital Television Transition, WT Docket No. 08-167

Dear Ms. Dortch:

On Wednesday, November 19, 2008, Christopher Guttman-McCabe, Vice President, Regulatory Affairs and Brian Josef, Director, Regulatory Affairs, CTIA—The Wireless Association®, along with Michael Lazarus of Paul, Hastings, Janofsky & Walker LLP (counsel to MetroPCS), Dean Brenner of Qualcomm, George Wheeler of Holland & Knight, LLP (counsel to U.S. Cellular), Donald Brittingham of Verizon Wireless, and Adam Krinsky of Wilkinson Barker Knauer, LLP (counsel to Verizon Wireless), met with Bruce Gottlieb, Legal Advisor to Commissioner Michael Copps.

During the meeting, the parties urged the Commission to act expeditiously to ensure that the use of low power auxiliary stations, such as wireless microphone systems, in the 700 MHz band does not threaten the future use of important spectrum that will become available with the February 17, 2009 DTV transition. The parties expressed concern regarding the significant risk of interference to both commercial and public safety communications systems caused by the continued use of the 700 MHz band by wireless microphones and other low power auxiliary stations after the transition date.

The parties urged the FCC to issue an order affirming the tentative conclusions in its recent Notice of Proposed Rulemaking.¹ Specifically, the Commission should: (1) revise the current rules to prevent low power auxiliary stations' operation in the 700 MHz band; and (2) prohibit the manufacture, import, sale, offer for sale or shipment of such low power devices operating in the 700 MHz band. The parties stressed the importance of an immediate decision prohibiting the

manufacture, import, sale, offer for sale or shipment to prevent further devices from entering the market, thereby exacerbating the interference problem. They also highlighted the continued efforts of numerous sales outlets to sell, often at significant discounts, wireless microphones operating in the 700 MHz bands in advance of any definitive FCC action.²

Pursuant to Section 1.1206 of the Commission's Rules, this letter is being electronically filed with your office. If you have any questions regarding this submission, please contact the undersigned.

Sincerely,

/s/ Brian M. Josef
