Re: PS Docket No. 07-250
Ex Parte Letter

Treasurer
Harald Braun
Harris Stratex Networks

Dear Ms. Dortch:

President & Chief
Executive Officer
Susan M. Miller
ATIS

As referenced in the Commission's February 2008, *First Report and Order* in the above-referenced docket, Working Group 6 of the Alliance for Telecommunications Industry Solutions ("ATIS") #4-Hearing Aid Compatibility ("AISP.4-HAC") has developed consensus labeling language to help consumers make informed choices on handsets operating in frequency bands and/or modes for which no HAC standard exists such as Wi-Fi or other new technologies.

Vice President of
Finance & Operations
William J. Klein
ATIS

The consensus labeling language, which was drafted and approved by consumers and industry representatives, would be conveyed in writing to consumers at the point of sale, in the form of an insert or text in boxed manuals and through websites. The consensus labeling language, originally filed in the above-referenced docket on September 11, 2008, is attached.

Please contact Thomas Goode, ATIS General Counsel, at 202-434-8830, or me at 202-434-8847 should you have any questions or comments.

Sincerely,

Deirdre Y. Cheek
Attorney

Consensus Labeling Language

This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids. It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider about its return and exchange policies and for information on hearing aid compatibility.
