

- My comment is in relation to Time Warner's request to spin off its cable division.
- I feel that Time Warner's nationwide distribution of pornography through its pay-per-view cable service is very detrimental to the minds and hearts of our people, especially the young.
- When considering the spin-off request, the FCC should research carefully the facts concerning the effects of pornography on serial killers and many other problems relating to crime. I believe they would find that the revenue is not worth the cost in lives and money dealing with crimes caused by it - if that is important to them. It would be wonderful if Time Warner would cease the distribution of all programming that is poisoning the minds of our families and communities.

Please consider some of the following proven statistics.

- Numerous studies show that pornography encourages distorted and unhealthy views of sexuality, particularly for deviant or violent types.
- Pornography encourages the sexual exploitation of women.
- Pornography devalues the importance of marriage as a beneficial and lasting institution for the good of society.
- Pornography negatively affects children, families and society
