Section 7. Product Labeling Information:

Do all hearing aid-compatible handsets include labeling?

Yes No

If no, please explain.

Do all hearing aid-compatible handsets with the Wi-Fi air interface have clear and effective disclosure that the handset has not been tested for hearing aid compatibility with respect to its Wi-Fi voice operation?

Not Applicable

Section 8. Public Website:

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system?

Yes No

If yes, please provide the address for the public website.

Section 9. Describe Consumer Outreach Efforts in the Past 12 Months:

Mid-Tex Cellular maintains a public website displaying their entire selection of handset and devices, including those that are HAC-compliant. Mid-Tex Cellular's sales staff is trained to assist existing and prospective customers in identifying HAC-compatible handsets and devices. Existing or prospective customers can typically find whether a handset or device is HAC-compliant by either checking the packaging containing the handset/device, or by consulting the packaging insert or operations manual. For more information on HAC, existing and prospective customers can be directed to www.accesswireless.org/hearingaid/brochures.cfm and other public websites dedicated to HAC education.

Section 10. (Service Providers Only) Describe the Levels of Functionality into Which the Compliant Handsets Fall and Provide An Explanation of the Service Provider's Methodology for Determining Levels of Functionality:

Mid-Tex Cellular offers HAC-compatible handsets and devices in all major price categories, including low-cost ("C" level) (<\$100), moderate-cost ("B" level) (\$100-\$250), and high-end/feature-rich ("A" level) (>\$250). Costs generally correlate with the number of features, but, if through experience, Mid-Tex Cellular finds that a certain handset contains features that work well with hearing aids, such as volume control, it will be labeled accordingly at the "high-end/feature-rich" or "A" level for functionality. Mid-Tex Cellular's sales staff is trained to assist all existing and prospective customers looking for a HAC-compliant device/handset. HAC-compatible handsets and devices vary in their inherent "levels of functionality," but typically at least one (1) HAC-compliant handset/device with features and services typical of its price category can be found that meets each customer's price range.
