

**Southern Ohio Health Care Network**  
**January 2009 Quarterly Report for 4<sup>th</sup> Quarter of 2009**

**I. Project Contact & Coordination Information**

**A.** The Southern Ohio Health Care Network (SOHCN) is incorporated as a 501(c)(3). The following is a list of SOHCN board members:

<u>Name</u>	<u>Position</u>	<u>Affiliation</u>
Marcus Bost	President	CIO, Adena Health System
Kristine Barr	Vice President	CIO/VP of Comm., O'Bleness Health System
Morgan Saunders	Vice President	Telecommunications Mgr., Holzer Consolidated Health Systems
Anthony Carna	Member	Neonatal Services, Nationwide Children's Hospital
Keith Coleman	Member	CFO, Adena Health System
Dr. Andy Eddy	Member	VP of Medical Affairs, Southeastern Ohio Regional Medical Center
Mark Harvey	Member	CIO, Holzer Clinic
Dr. Sathish Jetty	Member	CMIO, Adena Health System
Brian Phillips	Member	CIO, Ohio University College of Osteopathic Medicine
Tom Reid	Ex-officio	President, Reid Consulting Group
Eric Skomra	Member	IT Coordinator, Marietta Health Care Physicians, Inc.
Steve Trout	Member	Exec. Dir., Southern Consortium for Children

**B.** Contact information for responsible administrative officials:

Marcus Bost  
President, Southern Ohio Health Care Network, Inc.  
CIO, Adena Health System  
272 Hospital Road  
Chillicothe, OH 45601  
Phone: 740-779-7390  
FAX: 740-779-7498  
mbost@adena.org

Tom Reid  
President, Reid Consulting Group LLC  
4 Elizabeth Avenue  
Athens, OH 45701  
Phone: 740-590-0076  
FAX: 614-448-1718

**C.** The Southern Ohio Health Care Network Inc. Board of Directors is **legally** responsible for the conduct of activities supported by the FCC RHCPP award. As the pilot project's fiduciary agent, Adena Health System is **financially** responsible for the conduct of activities supported by the FCC RHCPP award.

## **Southern Ohio Health Care Network**

### **January 2009 Quarterly Report for 4<sup>th</sup> Quarter of 2009**

**D.** The staff of Reid Consulting Group (RCG) has contacted and/or visited all eligible health care facilities in the twelve Phase I counties included in the original RHCPP proposal to explain the SOHCN project and collect FCC-required letters of agency (LOA) from each. At the request of a SOHCN board member, we added Lawrence County to Phase I, bringing the total up to 13 counties. We now have LOAs from all eligible agencies in Phase I that intend to participate in the Southern Ohio Health Care Network.

In September, at the recommendation of several member health care providers, SOHCN decided to reach out to the health departments in each of the 13 counties included in Phase I of the network build. All but two of those health department commissioners agreed to join SOHCN and submitted letters of agency. The health departments, while cooperative, expressed muted interest in the project because they already receive free T-1 connections from the Ohio Department of Health. Yet including them in the Southern Ohio Health Care Network is important for creating a cohesive RHIO and for overall coordination throughout the region. Whether the health departments join the SOHCN or not, the SOHCN will connect to the statewide Ohio network (OSCnet), providing connectivity to the health departments in a more roundabout manner. If the SOHCN RFP can produce low enough costs, higher bandwidth connections may become more appealing to the health departments.

Phase II fieldwork will commence soon. However, as we stated in our original application, Phase II implementation may well be dependent on additional rounds of funding for the RHCPP.

#### **Coordination with Region:**

In April, the Southern Ohio Health Care Network (SOHCN) agreed to merge with Holzer Consolidated Health Systems (HCHS), the other Rural Health Care Pilot Project receiving funding in southeastern Ohio. In August, HCHS and Adena Health System jointly petitioned USAC and the FCC to approve their merger request. At the most recent SOHCN Board meeting (October 14, 2008), members unanimously agreed to create a co-vice presidency and appointed HCHS Telecommunications Manager Morgan Saunders vice president in order to more accurately reflect SOHCN project leadership after the merger is approved.

In the final quarter of 2008, the SOHCN board reviewed and offered comments/suggestions on the draft RFP prepared by Reid Consulting Group.

On December 5, 2008, FCC Wireline Competition Bureau Chief Dana R. Shaffer adopted an order accepting the merger request of the HCHS and SOHCN projects. As requested, the order names SOHCN as the successor to the HCHS Pilot Program project.

Upon the FCC's official approval of our merger, Reid Consulting Group initiated USAC's review process of the SOHCN's 465 package.

**Southern Ohio Health Care Network**  
**January 2009 Quarterly Report for 4<sup>th</sup> Quarter of 2009**

**Coordination with Government:**

In May, RCG presented an overview of the project to Ohio's USDA Rural Development office, at their request. A similar presentation was given to Fred Deel, director of Governor Voinovich's Office of Appalachia.

SOHCN is in regular contact with Glenn Enslin, grant coordinator for Rep. Zack Space (OH-18). We also keep in contact with Bridgeport Field Office staff of Rep. Charlie Wilson (OH-6). Both congressmen are adamant that SOHCN's expansion of broadband penetration must benefit not just the health care industry but entire communities throughout our region.

**Coordination with Technology Community:**

SOHCN's OSCnet liaison is Dennis Walsh, director of partner relations for OSCnet's Technology Infrastructure division. RCG President Tom Reid participates in a weekly conference call with Internet2 staff, partners and stakeholders.

**Southern Ohio Health Care Network**  
**January 2009 Quarterly Report for 4<sup>th</sup> Quarter of 2009**

**III. Network Narrative**

SOHCN has retained Reid Consulting Group to administer the network design and build. Reid Consulting Group specializes in data network planning, construction and maintenance, President Tom Reid has contracted with a network engineer, and they have prepared an RFP that is currently being reviewed by USAC.

RCG has conducted multiple rounds of engineering discussions with several interested carriers to explain the intended architecture and refine our understanding of carrier offerings.

Pending the completion of USAC's review, the SOHCN RFP will be officially posted for bid. Until then, the following slides provide an overview of the proposed network design.

## Foundation of Approach

Copyright © 2008  
All rights reserved. No part of this document may be reproduced without the written permission of the author.

- ¥ Achieve **Pervasive Access**
- ¥ Build-on and Create **Partnerships**
- ¥ Deploy **Open Architecture** solutions.

# Southern Ohio Health Care Network January 2009 Quarterly Report for 4<sup>th</sup> Quarter of 2009

## Open Architecture One Connection

- ¥ Supports secure intra-agency traffic.
- ¥ Any-to-any connectivity:
  - Within the SOHCN
  - To OSCnet
- ¥ Performance for HD telemedicine.
- ¥ Internet access options.

Draft

3 Sept 08

## Open Architecture Robust Backbone

- ¥ Fiber optic ring(s) for reliability.
- ¥ High speed backbone.
- ¥ Capacity to spare for other needs.
- ¥ Delivers metropolitan class service to Southern Ohio.

Draft

3 Sept 08

# Southern Ohio Health Care Network January 2009 Quarterly Report for 4<sup>th</sup> Quarter of 2009

SOHCN Backbone

## Link Options

Draft

3 Sept 08

## Key Facility Connectivity Options

Draft

3 Sept 08

**Southern Ohio Health Care Network**  
**January 2009 Quarterly Report for 4<sup>th</sup> Quarter of 2009**

## Data Replication Links

Primary

Replication

**Dedicated  
Bandwidth**

- ¥ Key facilities seek capacity to perform real-time data replication for business continuity and disaster recovery purposes.
- ¥ Need dedicated capacity between target facilities separate from the SOHCN backbone capacity, e.g. separate DWDM wavelength.
- ¥ Seeking speed options ranging from 1 Gbps to 40 Gbps.
- ¥ Possible use of Fiber Channel, FICON and/or ESCON protocols.

Draft

3 Sept 08

**Southern Ohio Health Care Network**  
**January 2009 Quarterly Report for 4<sup>th</sup> Quarter of 2009**

**IV. List of Connected Health Care Providers**

SOHCN does not yet have any health care providers that are connected to the network and operational.

**V. Non-Recurring and Recurring Costs**

SOHCN has not yet incurred any non-recurring or recurring costs.

**VI. Apportioned Costs & Funding Sources to Pay Them**

SOHCN has not yet initiated the process of apportioning costs. Adena Health System and Holzer Consolidated Health Systems (HCHS) are prepared to pay their 15% match when costs are incurred. RCG has made preliminary inquiries with other government agencies, representatives and grant programs to identify funding sources for eligible health care providers that will not be able to afford their 15% matches.

**VII. Requirements & Procedures Necessary for Ineligible Entities' Network Participation**

All ineligible sites listed in Section II are owned by or in some way affiliated with SOHCN's eligible agencies. These ineligible locations understand their responsibility for paying 100% of their network participation costs.

**VIII. Updates to Project Management Plan**

**A.** As stated above, during the second quarter of 2008, the Southern Ohio Health Care Network was incorporated as a 501(c)(3). SOHCN formed a Board of Directors and elected officers.

Holzer Consolidated Health Systems has contracted with Reid Consulting Group for support with network design, merger relations with the SOHCN, RFP creation and submission, vendor inquiries, etc.

The Southern Ohio Health Care Network and Holzer Consolidated Health Systems have requested FCC approval of their merger. The FCC posted the petition for public comment in October. It then posted an order approving the merger on December 5, 2008. The resulting joint project will fulfill the objectives stated in **both** original funding proposals.

At the most recent SOHCN Board meeting (October 14, 2008), members unanimously agreed to create a co-vice presidency and appointed HCHS Telecommunications Manager Morgan Saunders vice president in order to more accurately reflect SOHCN project leadership post-merger.

**Southern Ohio Health Care Network**  
**January 2009 Quarterly Report for 4<sup>th</sup> Quarter of 2009**

**B. Project Plan/Schedule**

SOHCN is ready to post its RFP for Phase I of the network build. We are currently waiting for USAC to complete its review process.

<b><u>Year:</u></b>	<b><u>Quarter:</u></b>	<b><u>Objectives:</u></b>
2009	1 <sup>st</sup>	Post our Form 465 Package and Phase I RFP
2009	1 <sup>st</sup>	Accept and evaluate Phase I proposals
2009	1 <sup>st</sup>	Award winning bid for Phase I
2009	2 <sup>nd</sup> – 4 <sup>th</sup>	Implement Phase I network build
2009	3 <sup>rd</sup>	Submit and post Phase II RFP
2009	3 <sup>rd</sup>	Accept and evaluate Phase II proposals
2009	4 <sup>th</sup>	Award winning bid for Phase II
2010	1 <sup>st</sup> – 3 <sup>rd</sup>	Implement Phase II network build

**IX. Network's Self-Sustainability**

At USAC's request, Reid Consulting Group has prepared and submitted the following SOHCN Sustainability Plan.

# Southern Ohio Health Care Network (SOHCN)

**WC Docket No. 02-60**

## Sustainability Plan

15 January 2009

On behalf of RHCPP Recipients

**Adena Health System** – Chillicothe, Ohio  
**Holzer Health Systems** – Gallipolis, Ohio  
**O’Bleness Health System** – Athens, Ohio  
and  
**All SOHCN Members**

SOHCN Sustainability Plan

# Southern Ohio Health Care Network Fiber-Optic Backbone

## The Challenges

The Southern Ohio Health Care Network (SOHCN) is a consortium of health care providers serving a population of 1.7 million across thirty-two rural counties spanning over 16,000 square miles of Southeast Ohio. The SOHCN service area includes the ten poorest and all six ARC-distressed counties in Ohio. Federal health-care designations blanketing the SOHCN region include Health Professional Shortage Areas (HPSA), one-dozen Critical Access Hospitals (CAH) and 40+ Federally Qualified Health Centers (FQHC).

Given these circumstances, health care professionals in Southeast Ohio are all too familiar with the challenges of practicing medicine in an impoverished, geographically isolated region. Broadband medical tools will provide the critical leverage needed to increase efficiency, improve outcomes and lower costs, but the required high-quality network connections remain unavailable.

## The Solution

SOHCN objectives include:

- Create an inclusive and sustainable broadband health care network open to all providers in the service area.
- Enhance sustainability of rural medical practices.
- Develop deeper, mutually beneficial collaboration among health care providers.
- Expand telemedicine capacity through immersive telepresence based on high-definition video, high-fidelity audio and the latest diagnostic equipment.
- Deliver high-impact continuing education programs for physicians and allied health professionals.
- Support a progressive community health record project and efforts to create a regional health information organization (RHIO).
- Participate in statewide efforts to build a unified health care information infrastructure and cooperative clinical services.

The SOHCN has already been awarded \$16.1 million under the FCC Rural Health Care Pilot program (RHCPP). The SOHCN originated with a partnership between the Adena Health System and O'Bleness Health System, resulting in an application for \$14.3 million in funding from the RHCPP. In addition, Holzer Consolidated Health System also received an award for \$1.8 million. Holzer agreed to join the SOHCN, pooling the collective resources to magnify the impact further. A formal merger request was approved by the FCC in late 2008.

With the FCC funding we are partnering with carriers to build the SOHCN Fiber-Optic Backbone that will deliver:

1. Connection of rural health care providers, large and small, to the robust network, subsidized by as much as 85%
2. Fiber-optic rings to provide the reliability necessary to support real-time health care innovations
3. Metropolitan-class broadband services in Appalachia available to businesses in the SOHCN communities at urban-market rates
4. Expanded residential broadband services

## Key Sustainability Factors

Our keys to network sustainability include the following:

- Support from three of the largest non-profit health care systems in the region (Adena Health System, O'Bleness Health System & Holzer Consolidated Health Systems)
- Partnering with telecommunication carriers to build and operate the fiber optic network
- Buy down of capital costs with the FCC funds to keep recurring costs within the budget range of our participating rural providers
- Expenses for existing T-1s and other communications facilities will remain committed to the SOHCN project
- Increased reimbursement for telemedicine services in the future
- Efficiencies gained through use of broadband health care tools
- More effective sharing of medical expertise and information within the region

Broadband health care tools will allow the SOHCN to improve the quality and reduce the cost of health care services:

- Critical and intensive care consultations from urban medical centers to rural hospitals using HDTV quality picture and sound
- At-home telemedicine for chronic conditions, improving health and reducing hospitalizations
- Communities of interest sharing best practices, responding to public health emergencies and delivering continuing medical education

**The SOHCN Inc. is a 501(c)(3) operated by an independent board under the fiduciary oversight of the Adena Health System Inc., 272 Hospital Road, Chillicothe, Ohio 45601**

## Project Partners

The SOHCN has secured the support and involvement of numerous partners. These partnerships will propel the SOHCN beyond mere sustainability into full realization of our broad agenda.

- Buckeye Hills – Hocking Valley Regional Development District (BH-HVRDD)
- Ohio Valley Regional Development Commission (OVRDC)
- Ohio Mid-Eastern Governments Association (OMEGA)

## Sustainability Details in the SOHCN RFP

We have included sustainability provisions in the SOHCN RFP. The following excerpts highlight the key provisions impacting sustainability. Of course, the overall design and procurement process is also key, but we refer readers of this sustainability plan to the full RFP for additional details.

### 1.3. Foundation of Approach

The SOHCN seeks to fulfill its mission based on three guiding principals:

1. Provide pervasive access to broadband services for the health care entities and the community at large
2. Achieve this ambitious mission by building on and creating partnerships with Carriers
3. Deploy open architecture solutions to provide full interoperability across the SOHCN, the State of Ohio and the nation

#### 1.4. Partnerships with Carrier(s)

Through this RFP, we intend to form partnerships with one or more Carriers to create and operate the SOHCN. This model features the health care providers as the “anchor tenants” to justify the investment by Carriers in our underserved region. The FCC funding provides the basis for the SOHCN Members to afford high-speed connectivity. From Carriers, we seek commitments to serve the health care facilities and to expand broadband in communities across the service region. Community broadband commitments could include:

- New types of broadband services
- Extended range of existing broadband services

#### 1.6. Importance of Community Broadband

The reasons for the SOHCN focus on improving community broadband are simple:

- a. Physician homes have emerged as a critical target for broadband deployment, providing essential after-hours coverage for rural facilities.
- b. The quality and efficiency of in-home patient care can be significantly improved by using technologies that rely on residential broadband connectivity.
- c. The financial strength of the rural health care providers depends on the overall economic well being of the region. Broadband for small businesses and residential customers provides an essential ingredient for economic growth.

Widespread broadband adoption across the region will improve the long-term sustainability of health care broadband through the economies of scale.

#### 3.1. Master Services Agreement with the SOHCN Inc.

The SOHCN Inc. will execute a master services agreement (MSA) with the Carrier(s) selected to implement the SOHCN. The SOHCN Members will decide which connection options to exercise. The SOHCN MSA will in no way obligate the Southern Ohio Health Care Network to purchase any guaranteed set of products or services.

#### 3.2. Connections to SOHCN Member Facilities

Installation of connections under the SOHCN MSA will be as a result of contracts between individual SOHCN Members and the Carrier(s) under the terms and conditions of the SOHCN MSA(s). Beyond the capital buy down for eligible facilities, the SOHCN members are responsible for paying all costs related to the services for which they contract under the SOHCN MSA(s). In no way does the SOHCN Inc. bear responsibility for such costs, collections and/or bad debt.

#### 3.3. Connections to Community Entities in Service Area

The SOHCN intends to benefit the general community as well as the SOHCN Members. Explain your company’s willingness to extend the terms, conditions and pricing in the SOHCN MSA to Community Entities.

### 3.4. Duration of Agreement and Contracts

1. The MSA between the SOHCN Inc. and the Carrier(s) shall become effective immediately upon signing by selected Respondent(s) and the SOHCN Inc.
2. The term of this MSA will be for a period of eleven (11) years, during which time SOHCN Members may purchase connections, equipment, supplies and services as specified in the bidder's response.

The contracts for service with SOHCN Members for connections to their facilities will be for a period of up to ten (10) years depending on when, during the term of the MSA, the SOHCN Member elects to install the connection(s) for their respective facilities.

### 3.5. Capital Buy Down Formula and the Standard Rate Formula

In the pricing sections for connections we seek the results of two rate formulas:

- *Standard Rate Formula* = Respondent's standard approach for pricing connections.
- *Capital Buy Down Formula* = Respondent front-loads the cost of the connection by offering a one-time price that includes related capital expenses so that a lower monthly recurring price can be offered.

### 3.6. Long-Term Sustainability

The FCC requires that the networks built with RHCPP funds offer long-term sustainability. After the eleven (11) year term of the MSA, will you commit to hold the rates for existing connections as a "not to exceed" cost for the connections on an on-going basis? For how many years will you commit to this "not to exceed" pricing? What other offers regarding sustainability does your company offer to the SOHCN?

**Southern Ohio Health Care Network**  
**January 2009 Quarterly Report for 4<sup>th</sup> Quarter of 2009**

**X. Network's Role in Advancing Telemedicine**

Given that our network has yet to be built, we have not had a measurable impact on telemedicine in our part of the state. However, in late September 2008, we were notified that our proposal to the USDA Rural Development's Distance Learning & Telemedicine program was successful. The \$277,695 grant award will provide four of the health care facilities in Phase I with telemedicine equipment and training. We have every intention of applying for additional USDA DLT funds to benefit our other member providers and will be applying this March for a 2009 award.

**XI. Compliance with HHS Health IT Initiatives**

We have not completed the competitive bidding process or network build yet. However, when we do, we intend to comply with all HHS initiatives and interoperability standards in order to support the creation of the Nationwide Health Information Network.

When the SOHCN is fully operational, it will be a tremendous support for our fledgling RHIO, the Appalachian Health Information Exchange (AHIE). AHIE has been floundering without broadband connectivity in Southern Ohio. The SOHCN will provide AHIE with central data storage of patient and public health information.

**XII. Coordination with HHS in Public Health Emergencies**

The SOHCN is not yet operational and so has not been capable of facilitating coordination with HHS. While we hope to never encounter public health emergencies in our region, we are confident that the connectivity an operational SOHCN will provide our participating health care facilities will enable them to fully cooperate with HHS and its Centers for Disease Control and Prevention.
