RHC Pilot Quarterly Report
Palmetto State Providers Network
January 30, 2009

FILED/ACCEPTED
FEB - 4 2009
Federal Communications Commission
Office of the Secretary

1. Project Contact and Coordination Information:

Project Coordinator:

Frank C. Clark, Ph.D.
Title: Vice President and CIO
Affiliation: Medical University of South Carolina
Mailing Address:
Office of the President
79 Ashley Avenue
P.O. Box 250001
Medical University of South Carolina
Charleston, SC 29425
E-Mail: clarkfc@musc.edu
Phone: 843-792-2211

Associate Project Coordinator:

W. Roger Poston, II, Ed.D.
Title: Director for Academic and Research Systems
Affiliation: Medical University of South Carolina
Mailing Address:
Office of the CIO
19 Hagood Avenue
P.O. Box 250801
Charleston, SC 25425
E-Mail Address: postonwr@musc.edu
Phone: 843-792-0134

Organization legally and financially responsible for the conduct of activities supported by the award:

Health Sciences South Carolina (HSSC) – A non-profit 501 c3 organization formed as a collaborative organization of the Medical University of South Carolina, the University of South Carolina, Clemson University, Palmetto Healthcare, Spartanburg Regional Healthcare Systems, and Greenville Hospital Systems. The HSSC office, president and staff are located at 1320 Main Street, Suite 625, Columbia, SC 29201. HSSC is organized with committees drawing from the administration of the three research universities and three major healthcare providers in South Carolina.

Statewide Project Coordination:

The Palmetto State Providers Network (PSPN) project is administratively coordinated by the Associate Project Coordinator in cooperation with the South

No. of Copies rec'd 2
List ABCDE

Carolina Department of Mental Health and the South Carolina Hospital Association. The PSPN Associate Coordinator reviews rural and urban hospitals and Community Mental Health Center clinics to determine eligibility and/or participation, directly solicits and receives information, Letters of Authentication and required questionnaires, and collates and organizes the data from these sites for the Request For Proposal. The Project Coordinator and Associate Project Coordinator work closely to insure that the appropriate forms and attachments, letters of certification and other required data are completed, verified and submitted. The Associate Project Coordinator also works with the South Carolina Light Rail to insure cooperation when the PSPN contract is awarded and with the four tertiary hospitals centers to insure their compliance with all data gathering to enable connectivity to the PSPN in the early phases of the project.

2. Identify all health care facilities included in the network:

The Request For Proposals is in draft form and ready for USAC/FCC review.

(October 30, 2008), Following all FCC/USAC requirements, policies and procedures, a Request For Proposals was approved, authorized and posted on August 21, 2008. The mandatory posting of 28 days was announced with a bid opening date of August 29, 2008. The RFP was also posted on the State of South Carolina Purchasing site with full instructions. All questions and corresponding responses were posted on the SC Purchasing Site. When submitted, PSPN submitted documentation regarding the names of any sources involved in the research and preparation of the RFP. A Change in Scope document outlining any and all changes to the original grant proposal was posted in addition with a document of assurance that vendors did not participate in the preparation of the RFP. The reallocation of funding for the project was also filed with USAC with an equal allocation of funds for the three budget cycles of the grant.

Four reviewers were identified for the PSPN RFP, each was required to sign a non-disclosure document for the State of South Carolina which clearly outlined the procedure for review and evaluation of the RFP as well as the prohibition of speaking with each other regarding the RFP prior to the RFP Review Conference. Forms were completed, signed, and delivered to the MUSC Purchasing Agent managing the RFP solicitation. An RFP review meeting was held on September 16, in which all responses were reviewed and given a final score by the review team, with oversight of the MUSC Purchasing Agent. A vendor was selected and notified by the MUSC Purchasing Agent and a meeting with a contract negotiations team scheduled. The first meeting was held on October 10. With a second meeting scheduled for October 22. Complete records are maintained for the matrix used to evaluate the submissions as well as the confidentiality statements signed by the group.

3. Network Narrative:

The Request for Proposals has been drafted for review and has not been posted. Health Sciences South Carolina (HSSC) and the Palmetto State Providers Network (PSPN) are seeking a qualified Primary Partner (PP) or Primary Partner Consortium (PPC) to enter into a broad-based, mutually beneficial partnership in accordance with this section of the RFP. HSSC and PSPN is seeking a vendor that will build, implement, manage, and maintain a robust state-wide broadband network that links rural caregivers in all 48 counties to the state's academic and large tertiary medical centers using a 10 gigabits (GB) lambda as the backbone network.

Phase I of the project calls for providing a 10 GB lambda backbone network connecting the hub sites listed under hub sites (Section 3.2). Linear and protected configurations should be proposed. In addition, access to Internet2 and/or National Lambda Rail is required to at least one of the hub sites. Access should include bandwidth options of 1Gb and 10Gb. Usage and connector fees for Internet2 and National Lambda Rail are not included in this RFP.

Phase II of the project calls for the linking of three large tertiary hospital systems; Palmetto Health, Greenville Hospital System, and Spartanburg Regional Medical Center to the Medical University of SC (MUSC) in Charleston via the backbone described in Phase I. Links to the backbone network from each of these facilities should be ten gigabits (GB) or 1 gigabits (GB) circuits with a one gigabit optional redundant path. We request that both 1GB and 10 GB circuits be bid. Both the primary and secondary circuits shall be bid separately. The tertiary hospital circuits will link back to hubs in or around Clemson, Columbia and Charleston specified under Hub Site section.

Phase III of the project calls for the linking of rural and perhaps urban clinics and hospitals across all South Carolina counties (see Appendix A for details)

back to the hub sites.. Ideally, links to these rural and perhaps urban hospitals and clinics will be either 4, 5,10 or 100 MB circuits. Bids should include pricing and availability of these circuit bandwidths for each location..

Key Circuit Attributes:

- Ethernet circuits should be non-blocking, clear channel transport "pipes".
- Network design is fully deterministic to ensure 100% bandwidth availability and full channel throughput.
- Circuits will provide full Committed Information Rate at all times. Excess Information Rate is not applicable.
- Maximum Frame Size: Any standard IEEE 802.1Q frame size can be transported
- Ethernet transport and access bandwidth must not be oversubscribed.
- All circuits should be designed to maximize network security

The network core equipment (routers, switches, etc.) should be located within the one or all of the 3 hub sites.

Hub Sites:

1. Charleston: #1 Charlotte Street, Charleston, SC
2. Clemson: 8120 Highway 76, Clemson, SC
3. Columbia: 1401 Main Street, 2nd Floor, Columbia, SC

Phase IV of the project will entail creating a network cloud around each of the rural and perhaps urban hospitals so as to provide broadband connectivity for clinics to the respective hospitals. The objective is to provide affordable broadband connectivity for as many community clinics to the respective rural hospitals and to PSPN, as possible. Connecting equipment on the remote sites as well as the hospital site should be included in the bid.

4. List of Connected Health Care Providers: Not applicable at this time.

(October 30, 2008) A total of 105 Health Care providers were identified for connection to the Palmetto State Providers Network. Of this number, 86 HPCs are eligible for RHC funding and 19 HPCs will 'pay their own way'. Until the contract negotiations are completed, the actual number of connected HPCs will not be available.

(January 30, 2009) A total of 86 eligible HPCs will be connected as indicated in the contract. Contract negotiations have not been finalized at the time of filing this report.

5. Identify the following non-recurring and recurring costs: Not applicable at this time.

(October 30, 2008). Non-recurring and recurring costs have been identified but are involved in the contract negotiation process. Non-recurring costs involve eligible equipment such as routers and switches as well as one-time installation fees. Recurring costs involve the monthly rates for service based and will be based on contract length and the total available bandwidth supplied to the HCPs.

(January 30, 2009) Non-recurring and recurring costs have been identified and are involved in the ongoing negotiations. The contract has not been signed at the time of the submission of this contract.

6. Describe how costs have been apportioned and the sources of the funds to pay them:

- a. Eligible sites will participate in the initial phases of the network with the 85% / 15% funding mechanism. These sites will have their connection to the PSPN covered under the costs of the grant.
- b. Non-eligible sites understand that connectivity to the PSPN will be on the "pay your own way" model and responsible for these costs when they are identified through the RFP process.
- c. Sources of the matching funds will be from state allocated funds to the Medical University of South Carolina and funds from the three tertiary care hospitals, Palmetto Health, Spartanburg Regional Healthcare, and Greenville Hospital System. These funds will collectively provide the 15% matching funds required by the grant.

(October 30, 2008) No changes in the source(s) of the matching funds are anticipated. All funds are currently located in a special account managed by the Medical University of South Carolina.

(January 30, 2009) No changes in the source of matching funds will be made. Funds are currently located in an account with the Medical University of South Carolina.

7. Identify any technical or non-technical requirements or procedures necessary for ineligible entities to connect to the participant's network: Not applicable at this time

(October 30, 2008) During the first phase of Contract Negotiations, the question of adding additional HCPs which were either in-eligible or eligible was raised. In addition, the question was posed as to the definition of 'fair share' for participants to pay to connect to the PSPN. Posing these questions to the USAC Program Integrity Assurance Officer, the response was: * Per my v-mail yesterday, please see paragraphs 19, 47, 90, 107, and 108 in the Order re: Fair Share. Bill England will bring this up on the 2pm call, today. There are questions out there about a

clear understanding of Fair Share. No promises that the call will clear up all questions, but Bill is aware. I think until we can get a better understanding of Fair Share, we may to qualify adding new "paying" sites after the network is built. Would all the new sites be Health Care Providers? Is so, then they could be added as you like, but then the Fair Share issue needs to be addressed.*

(January 30, 2009) Ineligible HPCs which were willing to pay their fair share of the connection and monthly fees can be added to the network, but at their expense. We have not received notification at this date what the 'fair share' allocation of expenses are to be. Through the RFP process, provisions were made for those ineligible HPCs which indicated that they would pay the fair share to connect were listed. The vendor has agreed to extend the connection pricing for the eligible sites to the ineligible sites as well as the monthly service fees. However, these ineligible sites will contract with the vendor and will not be eligible for RHC Pilot matched pricing.

8. Provide and update on the project management plan: A Project Management plan will be devised after the RFP has been awarded and a timetable for implementation of the network can be established. There will be a need to identify the technical staff and managers who will be responsible for working with the vendor in the build-out and deployment of the network.

(October 30, 2008) The successful vendor has proposed a timetable. However, it is a condition of the contract and the contract is not finalized at this time.

(January 30, 2009) The timetable is included in the on-going contract negotiations. A management plan will be provided after the contract is signed.

9. Provide detail on whether network is or will become self sustaining: Plans are for the network to become self-sustaining. Until the contract has been awarded and the actual costs known, the plan will not be fully developed and implemented.

(October 30, 2008) The contract specifying the actual cost for broadband service is under negotiation. Upon completion of contract negotiations, recurring monthly fees will be clearly identified.

(January 30, 2009) The following is the stated plan for self sufficiency: After 37 months, the sustaining of the PSPN will be provided through a combination of the following sources: RHC funding , if available , HSSC grant funds, a portion of the fees generated from telemedicine/ tele-health /remote ICU monitoring programs, fees collected from for-profit network members and other state (Health & Human Services) and federal (Medicare & Medicaid) grants. For profit network participants who join PSPN after the initial phase, will pay for their connections to the area's broadband point-of-presence (POP), usually the regional hospital and contribute to the ongoing support PSPN. In the case of physicians' offices, most are already paying for some type of connectivity to the

commercial internet. The broadband link to the PSPN would replace the existing connection. Medical insurance providers and Rx entities will be assessed fees to be part of PSPN.

In addition to subscriptions from for-profit entities, the network will allow participating locations to access commercial Internet services via the same connection, displacing existing Internet access costs. The displacement of these expenses will enable the public/non-profit facilities to cover the costs of the network not funded by the grant. (15%) This will add to the sustainability of the network long term.

10. Provide detail on how the supported network has advanced telemedicine benefits:
Not applicable at this time.

(October 30, 2008) Not applicable at this time.

(January 30, 2009) Not applicable at this time.

11. Provide detail on how the supported network has complied with HHS health IT initiatives: Not applicable at this time.

(October 30, 2008) Not applicable at this time.

(January 30, 2009) Not applicable at this time.

12. Explain how the selected participants coordinated in the use of their health care networks: Not applicable at this time.

(October 30, 2008) Not applicable at this time

(January 30, 2009) Not applicable at this time.
