

I am asking the FCC to preserve our community PEG Channels by granting the petitions of the Alliance for Community Media CRS-8126, the City of Lansing, Michigan CSR-8127 and the City of Dearborn, Michigan CSR-8128.

These petitions will stop the harmful and discriminatory acts by AT&T, Comcast and other companies that are making these channels very difficult to find, reduced quality, unable to record by DVR, impossible to reach by channel surfing, the inability to add closed captioning or a second language, removal from channel guides, and expensive when placed on costly digital tier. The Atlanta community wants its PEG channels to be available to all cable subscribers just as the commercial channels are distributed.
