

My In-Laws own the set top TV Guardian for television and we own a DVD player with TV Guardian installed and we love it. Sadly, the set tops are no longer available and DVD players are hard to find with that feature. We are big Television and movie buffs, but DO NOT enjoy all of the foul language that comes along with it. So TV Guardian has been a God Send for our family. We would love to have it installed in our Cable Box as well. Please pass a law requiring all satellite, cable, tv's, dvd players, game consoles..etc..so that families like mine have the option of enjoying tv and movies and games without the foul language.

Sincerely,  
Kelly Estep
