

TVG has been a huge benefit to my family. The ability to censor inappropriate material for our four boys, as well as myself, has had an impact beyond my words to express. Without TVG our enjoyment of TV and movies would be severely limited.

We have told many friends about TVG and there is always a positive response - if TVG was more readily available there would be plenty of demand. The question is not if people want TVG BUT where and how can they get it. Families like mine would LOVE to be able to pay a small monthly fee to ensure clean programming for our families. It would also give incentive for companies such as Universal to do a better job at closed caption for their movies - which oftentimes TVG does not work on.

In a day where millions of viewers are desiring cleaner programming to be available for their families TVG would be a celebrated option. All of our stand alone units are getting older and are not very compatible with newer technology. This is a concern for me and my family and we would appreciate your action to allow TVG as an option for viewers to enjoy.

Sincerely,
Darren Dix
