

My wife and I are strong supporters for having TV Guardian required as a part of TVs, DVD Players, Blu-Ray players, cable, satellite, computers, the Internet, DTV converter boxes, and DVRs.

We raised our children using TV Guardian, and we continue to use it now that our children are grown and gone. To eliminate the profanity and obscenity so common to TV programming today is very desirable. Because TV Guardian does not work on HD, we ask that you require it to be a part of the video devices listed above.

We would be willing to pay a few dollars each month for the TVGuardian feature in cable/satellite, if that is the only way these companies would offer it.
