

I urge you to please help make the TVGuardian available to the public. I would certainly be willing to pay a small price each month in order to ensure my home is free (or virtually free from the foul language that is rampant on TV and in movies these days. I use the stand-alone TVGuardian, and I feel certain I would not be able to watch many programs if I did not have it. Please allow those of us who want it to have it. Those who do not care would not be bothered, and those of us who do would be happy, happy, happy!!
THANKS
