

Dear Sir/Madame, Our family has had the TV Guardian for several years now. It has been a necessary tool to block offensive language that is so prevalent in otherwise good movies. I urge you to allow and expand this ability to block offensive language to as many forms of video files as possible. Thank you for considering all US citizens rights to allow us to make sure "free speech" is respectable and not "free foul mouthed speech" in the movies we would like to otherwise see.
