

We have used the TV guardian for many years and do not like to watch tv without it! I was so excited to see that Walmart had TV Guardian already installed in some dvd players! It is pretty accurate and we would love to see it more readily available on tv's, dvd's, internet,ipod, phones...It's a great option for those that want that! Not having access to that will seriously limit what we watch. Thank you, Tom and Lisa Houck
