

I want to tell you that I love the TV Gaurdian & would like to see that technology used on the internet, cable, dish, cell phones, dvd players, etc... I cannot stand foul language & using the TV Gaurdian has had allowed me to watch programing & movies that previously I would not watch due to the language. Occassionally it will miss a word & I don't know if that is a TV Gaurdian issue or closed captioning issue but it is better than the alternative. Everyone should be able to have this option to use with all technology. Contrary to popular belief in Hollywood, not everyone wants their children or themselves to be subjected to that language.
