

USAC recommended that we file a Window Waiver in order to be able to appeal the deletion of FRN# 1762539, which was cancelled by our Technology Director who is no longer with us. We only have documents for the original RAL and USAC claims that Greg filed a second RAL deleting the entire FRN. We don't know why he would have done this. We have received the services in question and are now in a difficult position. We are requesting Waiver of the 60 day appeal policy. We hate to assume that our previous technology director had some alternative motives in his actions, but he left no explanation or documentation of the second RAL.
