

I would highly recommend that TV Guardian be available in any way possible. We have used it now for 2yrs. or so and appreciate that we do not have to listen to all the garbage being said. We would like to see it be available over the internet as we enjoy watching movies on the computer. We wish we had it when our children were younger. Without it being available, we would not watch much of anything. Definitely worth paying a few extra dollars. We are so happy with ours and enjoy watching some TV and DVD's on our player without having to listen to foul language.
