

Verizon is STILL blocking certain traffic on their wireless internet service. They do not let music and sound effect files be downloaded to the mobile phones on their network from any web site except their own.

**BOTTOM LINE:**

**WIRELESS INTERNET SERVICE SHOULD BE TREATED EXACTLY THE SAME AS WIRED INTERNET SERVICE IS CONCERNED FOR THESE PHONE COMPANIES!! WIRELESS INTERNET IS NO DIFFERENT THAN WIRED INTERNET SERVICE AND THESE MOBILE PHONE COMPANIES SHOULD NOT BE PERMITTED TO RUN THESE "WALLED GARDENS" THAT ARE ANTI-COMMERCIAL, ANTI-COMPETITIVE, AND TOTAL NON-NEUTRAL.**

Verizon's policy in this matter prohibits ringtone vendors such as our company from being able to sell effectively to Verizon's mobile phone clients. Please regulate this and force all companies providing Internet service, whether wired or wireless, to not be permitted to block content of any type for their exclusive benefit of being able to run a "walled garden" of e-commerce.
