

REF: Foul language filtering technology:

It's speaks volumes in the first place, we need this technology. If the FCC would not cave in to the media pressure to push the envelope by allowing more and more foul language and all other improper content to be broadcast, we wouldn't need it.

In the meantime please allow the free market to work and allow me to choose to continue to have this technology so I can have more control what comes into my home.

FYI: Nearly all, if not all of the current "primetime" TV shows being broadcast are not being viewed in my home due to inappropriate content such as foul language, sexual content, violence, etc.
