

I am writing to comment on the FCC's discontinuation of foul language filtering technology in the new generation of Digital equipment.

I definitely want foul language filtering technology on TV, cable, satellite and other devices that show TV programs and movies.

Why is it that government bureaucracy wants to limit individual control over what happens in our own homes? You desire to control who uses the public airwaves, but when an opportunity exists for you to allow "free speech" over the air/cable systems and give individuals the choice as to whether they want to hear it or not you back down.

Please make sure this technology continues into the newer generation of receivers.

Sincerely,

Dr. R. Fuller
