Dear FCC,

I understand that you are asking for comments on whether advanced parental control technology should be made available for filtering offensive content in TV programming and movies; whether viewed on TV, over the Internet, cable, satellite, DVD Players, Blu-Ray Players, gaming consoles, or other video devices.

Both I, and my wife do want foul language filtering technology on TV, cable, satellite and other devices that show TV programs and movies.

As you know, there are millions of homes that have already benefited from automatic foul language filtering technology, which uses the existing hidden closed-captioning signal to detect and mute offensive language.

We are asking you to insure each person and family's choices to maintain our standard of decency through these new technology options.

Thank you for your protection regarding this important issue.
