

My family would greatly benefit from the continued use of foul language filtering technology on TV, cable, satellite and other devices that show TV programs and movies. We also filter pornography, R-rated movies and Adult-Oriented programming. Personally, I would rather not have this stuff available in my list of programming packages at all, but seeing that we should uphold the constitution and the right to free speech, I also feel that I as a parent should have the capability to filter what types of media come into my house in any form.
